PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building scalable, data-intensive web applications using React.js, TypeScript, and Next.js. Proven track record delivering enterprise analytics dashboards handling 10M+ daily records for U.S. federal clients. Specialized in performance optimization (40% load time reduction), accessible UI design (WCAG 2.1 AA), and Agile/Scrum delivery. Experienced collaborating with backend, design, and product teams to ship production-grade UIs on bi-weekly release cycles.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Next.js

State Management: React Hooks, Context API, Redux Toolkit, React Query

UI & Styling: Material UI (MUI), Tailwind CSS, Bootstrap, CSS Grid, Flexbox, Nivo Charts

APIs & Data: REST APIs, SQL, JSON, Data Tables, Filtering, Pagination

Performance: Code splitting, lazy loading, memoization, rendering optimization

Testing & Tools: Jest, React Testing Library, Git, CI/CD, Vite, Chrome DevTools

Methodologies: Agile, Scrum, Sprint Planning, Code Reviews, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

NexGen IT

Frontend Engineer

Remote, USA

July 2022 – Present

Stack: React, TypeScript, React Query, Redux Toolkit, MUI, REST APIs, Next.js

- Architected and led frontend of an enterprise analytics dashboard validating 10M+ records daily for a government data quality program, reducing manual reviewer workload by 30%.
- Increased analyst throughput by 25% by building advanced data tables with multi-column filtering, search, pagination, and client-side state — enabling teams to process larger record volumes without additional headcount.
- Optimized frontend rendering for large datasets using memoization, lazy loading, and component reuse, improving page load times by 40%.
- Implemented WCAG 2.1 AA accessibility standards across all dashboard components, ensuring compliance for federal program requirements.
- Leveraged Next.js SSR and static generation strategies to improve SEO and initial page load performance.
- Collaborated with backend engineers to define REST API contracts and with designers to translate Figma wireframes into responsive, pixel-accurate React components.
- Wrote unit and integration tests using Jest and React Testing Library, maintaining >85% component coverage.

US Census Bureau

Graduate Frontend Developer

Little Rock, AR (Remote)

Oct 2022 – May 2024

- Built an internal React application used by Census Bureau staff and researchers to navigate structured government datasets across multiple pages.
- Designed scalable routing architecture and reusable layout components, reducing future feature development effort.
- Configured Vite-based build pipeline and deployed to GitHub Pages with custom base path routing for production use.

DXC Technology

Frontend Developer

Hyderabad, India

July 2020 – August 2022

Stack: React, Material UI, Nivo Charts, REST APIs

- Developed and maintained production React applications, owning feature development from requirements through deployment.

- Built a reusable component library and design system used across 3 product teams, reducing feature development time by 30%.
- Integrated third-party libraries including Material UI, Nivo Charts, and React Query to accelerate UI delivery.
- Ensured cross-browser compatibility (Chrome, Firefox, Safari, Edge) and WCAG accessibility compliance across all components.
- Documented component architecture and onboarding guides, reducing new developer ramp-up time.

PROJECTS

Enterprise Analytics Admin Dashboard | React.js · Material UI · Nivo Charts · GitHub Pages

- Production-style analytics dashboard with dynamic Line, Bar, Pie, and Geographic charts built with Nivo; supports Dark/Light mode theming.
- Engineered reusable StatBox, ProgressCircle, and Chart components following scalable frontend architecture principles.

Live: mohammedmuz1731.github.io/Dashboard GitHub: github.com/mohammedmuz1731/Dashboard

Personal Portfolio | React (Vite) · GitHub Pages

- Built and deployed a production-ready React portfolio showcasing enterprise-level component architecture, responsive design, and performance optimization.

EDUCATION

University of Arkansas at Little Rock

May 2024

Master of Science, Information Quality | GPA: 3.9/4.0

Deccan College of Engineering

August 2020

Bachelor of Science, Information Technology | GPA: 3/4.0
