

MOHAMMED MUZAFFAR AHMED

Little Rock, AR, 72204; 501-708-3426; muzmohammed98@gmail.com

LinkedIn: <https://www.linkedin.com/in/muzmohammed98>

PROFESSIONAL SUMMARY: Frontend Engineer with 5+ years of experience building high-performance, data-intensive React applications. Specialized in scalable component architecture, enterprise analytics dashboards, and optimizing workflows for datasets with 10M+ records. Experienced in collaborating with backend teams and delivering production-grade, user-centric UI solutions.

SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Next.js

State Management: React Hooks, Context API, Redux Toolkit

UI & Styling: Material UI (MUI), Tailwind CSS, Bootstrap, CSS Grid, Flexbox, Nivo Charts

APIs & Data: SQL, REST APIs, JSON

Tools & Platforms: Git, CI/CD, Chrome DevTools

Performance: Code splitting, memoization, lazy loading

PROFESSIONAL EXPERIENCE

NexGen IT, (Remote, USA)

July 2022 - Present

Frontend Engineer

Tech: React, TypeScript, React Query, Redux Toolkit, REST APIs

- Architected and led frontend development of React-based enterprise analytics dashboards validating 10M+ records daily, reducing manual review time by 30%.
- Developed scalable React UI modules supporting validation of 10M+ records, increasing reviewer throughput by 25%
- Implemented advanced data tables with filtering, search, pagination, and client-side state management to streamline analyst workflows
- Optimized frontend performance for large datasets by improving rendering logic and component reusability
- Partnered with backend engineers and product teams to define REST API contracts and ensure consistent UI behavior
- Applied reusable component architecture and modern React patterns to improve maintainability across data-driven workflows

US Census Bureau – Graduate Assistant

Oct 2022 – May 2024

- Developed responsive multi-page React application using React Router and Tailwind CSS
- Implemented structured routing and reusable layout components for scalable UI architecture
- Configured production deployment via GitHub Pages with custom Vite base path handling

DXC Technology, India

July 2020 – August 2022

Frontend Developer

- Developed and maintained production Angular applications, owning feature implementation from requirements through deployment
- Developed reusable UI components and design systems, reducing feature development time by 30%
- Integrated frontend applications with REST APIs for authentication and data workflows
- Migrated legacy UI to modern Angular architecture, improving maintainability and performance
- Optimized page load times using lazy loading and code splitting, reducing load time by 40%

PROJECT EXPERIENCE

1) Enterprise Analytics Admin Dashboard (React + MUI + Nivo)

Live : <https://mohammedmuz1731.github.io/Dashboard/>

Github : <https://github.com/mohammedmuz1731/Dashboard>

- Developed a production-style Admin Analytics Dashboard using React.js, Material UI, and Nivo Charts
- Engineered reusable UI components (StatBox, ProgressCircle, Chart modules) improving component reusability and scalability
- Implemented dynamic data visualizations including Line, Bar, Pie, and Geographic charts
- Designed responsive grid-based layout with custom theme system (Dark/Light mode toggle)
- Deployed application to GitHub Pages with CI-based build configuration
- Designed modular folder structure and component hierarchy following scalable frontend architecture principles.
- Enabled analysts to visualize and interact with large-scale enterprise data efficiently.

2) Personal Portfolio – React (Vite) | GitHub Pages

Live: <https://mohammedmuz1731.github.io/mohammed-portfolio/>

Github : <https://github.com/mohammedmuz1731/mohammed-portfolio>

- Designed and deployed a production-ready React portfolio demonstrating scalable dashboard development and reusable component architecture
- Configured Vite build pipeline and GitHub Pages static deployment with custom base routing
- Applied responsive design, performance optimization, and accessibility best practices
- Structured project sections to highlight enterprise-level React experience and data-driven UI workflows
- Demonstrates enterprise-level component architecture and production-grade frontend practices.

EDUCATION

The University of Arkansas at Little Rock

Master of Science, Information Quality

May, 2024

3.9

Deccan College of Engineering, India

Bachelor of Science, Information Technology

August, 2020

3.0
