

MOHAMMED MUZAFFAR AHMED

Little Rock, AR, 72204; 501-708-3426; muzmohammed98@gmail.com

LinkedIn: <https://www.linkedin.com/in/muzmohammed98>

PROFESSIONAL SUMMARY: Frontend Engineer with 5.5+ years of experience building scalable, data-driven React applications for enterprise and analyst-facing platforms. Strong expertise in reusable component architecture, frontend performance optimization, and integrating REST APIs for large datasets. Experienced working in Agile, cross-functional teams.

SKILLS

Frontend : React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Next.js , React Query

Testing : Jest, React Testing Library

State Management: React Hooks, Context API , Redux Toolkit

Styling : Tailwind CSS, Bootstrap ,CSS Grid, Flexbox

APIs & Data : SQL , REST APIs, JSON

Tools & Platforms : Git, CI/CD, Chrome DevTools

Performance : Code splitting, memoization, lazy loading

Accessibility: ARIA attributes, keyboard navigation, basic WCAG compliance

PROFESSIONAL EXPERIENCE

NexGen IT, (Remote, USA)

July 2022 - Present

Frontend Engineer

- Designed and owned React dashboards used by analysts to validate millions of historical records daily, reducing manual review time by 30%
- Developed scalable React UI modules supporting validation of 10M+ records, increasing reviewer throughput by 25%
- Implemented advanced data tables with filtering, search, pagination, and client-side state management to streamline analyst workflows
- Optimized frontend performance for large datasets by improving rendering logic and component reusability
- Partnered with backend engineers and product teams to define REST API contracts and ensure consistent UI behavior
- Applied reusable component architecture and modern React patterns to improve maintainability across data-driven workflows
- Made frontend design decisions around component structure, state management, and performance trade-offs for data-intensive workflows

DXC Technology , India

July 2020 – August 2022

Frontend Developer

- Developed and maintained production Angular applications, owning feature implementation from requirements through deployment
- Developed reusable UI components and design systems, reducing feature development time by 30%
- Integrated frontend applications with REST APIs for authentication and data workflows
- Migrated legacy UI to modern Angular architecture, improving maintainability and performance
- Optimized page load times using lazy loading and code splitting, reducing load time by 40%
- Worked cross-functionally with backend, QA, and product teams to deliver features in Agile sprints with predictable timelines

PROJECT EXPERIENCE

Personal Portfolio – React (Vite) | GitHub Pages

Live: <https://mohammedmuz1731.github.io/mohammed-portfolio/>

- Designed and deployed a production-ready React portfolio demonstrating scalable dashboard development and reusable component architecture
- Configured Vite build pipeline and GitHub Pages static deployment with custom base routing
- Applied responsive design, performance optimization, and accessibility best practices
- Structured project sections to highlight enterprise-level React experience and data-driven UI workflows

US Census Bureau – Graduate Assistant | Oct 2022 – May 2024

- Developed frontend components to review and validate large-scale historical name and address datasets
- Supported analyst-facing workflows through UI improvements and frontend testing

Additional Projects: Myntra Clone : Built a React-based e-commerce frontend implementing reusable components and responsive layout patterns

EDUCATION

The University of Arkansas at Little Rock	May, 2024
<i>Master of Science, Information Quality</i>	3.9
Deccan College of Engineer, India	August, 2020
<i>Bachelor of Science, Information Technology</i>	3.0
